MOHAMMAD ABDUL AZIZ

Software Developer | Angular | TypeScript | JavaScript | Frontend Development

0176 5655 4418 m.a.aziz1900@gmail.com LinkedIn Hannover

SUMMARY

Software Developer with around five years of experience building Angular and TypeScript web applications, reusable UI components, shared libraries, REST API integrations, and data-driven frontend features. Experienced in component-based frontend development, responsive user interfaces, accessibility, internationalization, code reviews, pair programming, unit testing, and Agile collaboration. Built and maintained scalable enterprise applications, contributed to Angular upgrades, and worked with CI/CD pipelines, quality checks, and modern development workflows including AI-assisted coding tools.

EXPERIENCE

12/2022 - 07/2025

Hannover, Germany (Remote)

Software Developer

Ninjaneers GmbH

- Contributed to a large-scale enterprise insurance platform used by 20+ development teams, collaborating in a complex multi-team environment.
- Built and published reusable, accessible Angular components and libraries, including navigation headers and menu bars, to Nexus for reuse across multiple teams and applications, improving UI consistency across the enterprise portal.
- Worked within a central Nx based micro-frontend portal that enabled multiple business domains to integrate domain-specific pages, and contributed to Angular upgrades from v16 to v18 while supporting other teams with migration issues.
- Built data-driven Angular features, including searchable and filterable data tables, user profile and settings functionality, and interactive HTML/CSS visualizations for cross-domain insurance cases, following Figma designs and UI standards.
- Enhanced Angular components for internationalization and accessibility. Added translations, semantic HTML, screen-reader support, keyboard navigation, and responsive layouts with CSS Container Queries.
- Integrated REST APIs across frontend features and handled the frontend/API integration of Qualtrics within the enterprise portal.
- Wrote Angular unit tests with Jasmine and Karma to meet the project's 80% coverage requirement, used SonarQube for pre-PR quality checks, worked with Jenkins and GitHub Actions for development and pre-production deployments, and collaborated in an Agile environment.

04/2022 - 09/2022

Berlin, Germany

Software Developer

AdUp Technology

- Contributed to the development of a digital advertising platform, implementing frontend features for creating and customizing advertisements.
- Developed functionality that enabled users to work with predefined advertisement templates and customize ad content based on their requirements.
- Developed and maintained user-facing features using Angular and TypeScript in an Agile development environment.
- Participated in code reviews and pair programming to improve code quality, knowledge sharing, and team collaboration.

04/2020 - 08/2021

Plochingen, Germany

Junior Angular Developer

Platri IT GmbH

- Worked as a Junior Angular Developer at Platri IT GmbH on a client assignment for JW Froehlich Maschinenfabrik GmbH.
- Contributed to the development of the Solviso application, a measurement and test engineering platform for analyzing and visualizing engine test data.
- Developed and maintained interactive frontend features using Angular, TypeScript, NgRx, RxJs and REST APIs.
- Implemented charts, graphs, and data visualizations using Highcharts to support the analysis and presentation of measurement and test results.
- Collaborated with the development team in an Agile environment, working with Scrum and later Kanban, while using Git/GitHub for version control and collaboration.

07/2019 - 01/2020

Berlin, Germany

Frontend Developer Trainee (Angular & TypeScript)

Freachly GmbH

- Developed and maintained frontend pages and reusable UI components using Angular, TypeScript, and Angular Material.
- Integrated frontend functionality with REST APIs and contributed to the development of responsive web applications.
- Developed and maintained user-facing features using Angular and TypeScript in an Agile development environment.
- Participated in code reviews and pair programming, and contributed to unit testing to improve code quality, knowledge sharing, and team collaboration.
- Contributed to frontend unit testing to help ensure application quality.

EXPERIENCE

05/2018 - 05/2019

Würzburg, Germany

Full-Stack Web & Mobile Developer (Work Study)

Futures Services GmbH

- Developed the CO_2 Monkey CMS as part of my Master's project, delivering a scalable IT-assisted solution for voluntary CO_2 compensation for my Master's thesis.
- Developed web and hybrid mobile application features using Angular, Ionic, TypeScript, Node.js, Express.js, and MongoDB.
- Developed REST APIs and custom CMS functionality for content management and administrative features.
- Built responsive user interfaces using Angular Material, Bootstrap, HTML, and CSS.
- Used Git, Postman, and Visual Studio Code throughout the software development lifecycle.

SKILLS

Frontend

Angular, TypeScript, JavaScript, React (Basic), Bootstrap, RxJS, NgRx, HTML5, CSS3, Angular Material, Nx, Micro-Frontends, Allianz NDBX, Accessibility, Internationalization

Backend & APIs

Node.js (Basic), REST API Integration, Third-Party Integrations

Backend & Currently Expanding

Java, Spring Boot, Maven, JUnit 5, Mockito, MongoDB, PostgreSQL, Docker

Testing & Code Quality

Jasmine, Karma, SonarQube, Unit Testing

CI/CD & Version Control

Git, GitHub, Jenkins, GitHub Actions

Development & Collaboration Tools

IntelliJ IDEA, Visual Studio Code, Jira, Figma, Zeplin, Nexus, GitHub Copilot, Claude, AI-Assisted Development

Agile & Collaboration

Scrum, Kanban, Code Reviews, Pair Programming

LANGUAGES

English — Fluent

German — B1 (certified)- currently learning B2

Bengali — Native

EDUCATION

06/2026 - 10/2026

Remote, Germany

Java Development with AI – Full-Time Bootcamp

neuefische GmbH - School and Pool for Digital Talent

09/2015 - 07/2019

Kiel, Germany

Master of Science, Information Engineering

Fachhochschule Kiel

11/2007 - 07/2012

Malaysia

Bachelor of Information Technology

Universiti Utara Malaysia
